

## High Quality General Purpose Calcium Grease

**CAPRON Calcium Grease** is a basic grease which provides high-anti rust capacity, high water resistance and vast operating temperature range. It has a mineral oil base and is used as a general lubricant for metallic surfaces, frames and car bodies.

### Characteristics

Grade ►	NLGI 2	NLGI 3	ASTM
▼ Characteristics			
Thickenet Type	Calcium	Calcium	D-3340
Dropping Point , °C	95	95	D-566
Worked penetration@25°C, 0.1mm	265 - 295	220 - 250	D-217
Operating temperature, °C	-20 to 60	-20 to 60	Experimental
Texture	Buttery	Buttery	Visual
Pumpability (aparrent viscosity)	Excellent	Good	D-1092

### Applications

- Chasis and automative water pumps.
- Axle, wheel bearing and universal joint of heavy and light vehicles
- Plain and rolling bearings operating under high load
- Electric motor bearings under high load
- Suitable as general purpose grease for industrial applications requiring extreme pressure and high temperature grease.

### Advanteges

- Outstanding resistance to water wahsout.
- Vast operating temperature range.
- Excellent protection against corrosion and wear.
- Good structure stability against successive temperature variations.
- Friction reduction

Available in : 180 Kg Drum - 13 Kg Pail - 4.5 Kg Gallon
